

5 GHz Wlan Grid Parabolic Antenna WDB-5.4G-240

This antenna is a high gain, high power and long distance and large F/B Ratio antenna. It is constructed with die-cast aluminium alloy for tough environment.

Specification

Frequency:	5470 – 5725/5725-5850 Mhz
Nominal Impedance:	50 Ohms
Gain:	24dBi
WSWR:	< 1.5:1
Horizontal Beamwidth:	12 degree
Vertical Beamwidth:	19 degree
F/B ratio:	> 20
Max Power:	100Watts
Polarization:	Vertical/Horizontal

Mechanical Parameters

Color:	White
Connector:	SMA/N-type
Dimension (mm):	300x400
Weight:	3.0 kg
Material:	Aluminium Alloy
Rated Wind Velocity	60m/s
